DEVRO

Take the product from the box and load it on to the filling tube...

Clear, open end first...

Close the end...

Thumb & finger control...

Slightly under fill the casing leaving enough room for the meat to move in the casing and give a good appearance.

Fill smoothly...

Leave a wrinkle...

Make it even...

Once the strand is filled, linking is a similar step to the standard procedure.

To begin, pinch the strand with the pads of your finger and thumb. Make a space for the first twists. Don't use your nails as this will tear the casings.

Use flats of fingers...

Make a space...

Form the loop...

Only twist the skin, not the skin and the meat. Continue forming the links in this easy simple way.

Form the loop, twist the casing through, then form the next loop. Continue in the usual way.

Saving up to 25% of your sausage making time!
